EXPLANATION OF MARGINAL INDEX.

The index letters and figures following the names of counties and chief cities in the Marginal Index refer to that point on the map at which lines, if drawn between the letters upon either side and figures top and bottom of map, would cross each other at right angles. For example, to find "New York, D-5," let the diagram below represent the map; New York is found near the crossing of lines D-D and 5-5.

The figures placed before the names of cities and towns denote the population in thousands or hundreds, according to the headings, care having been taken to arrange them in the order of their size, as shown by the latest Official Census Returns.

This is a detailed historical map of the state of Georgia, showing county boundaries, major cities, and geographical features. The map is color-coded by county and includes a scale bar at the bottom left. The title "GEORGIA" is prominently displayed at the top center. The map shows the state's location relative to neighboring states: North Carolina to the north, Florida to the south, and Alabama to the west. Major cities such as Atlanta, Savannah, and Augusta are marked. The map also shows the state's coastline and major water bodies, including the Atlantic Ocean and the Georgia River. The scale bar indicates distances in miles and kilometers.
